

Negative incidents and effects of psychological treatment

Incidents and effects that are viewed as both positive and negative can occur during treatment. We now want you to think about what happened during the period when you received your treatment, and that you consider if anything you experienced was negative or unwanted. Read through the following statements and mark whether you experienced any of these incidents or effects. If you answer yes, please indicate the severity of your experience (how negative the experience was for you), and whether you believe your experience was caused by the treatment you received or other circumstances that occurred during the same period as your treatment.
